LEONARD KOMBO

Full-Stack Software Developer (Web & Mobile)

Nairobi, Kenya • Available for Global Remote Roles • +254 793 556 235

leonardkombo14@gmail.com | Portfolio | GitHub: lennykombo | LinkedIn

PROFESSIONAL SUMMARY

Full-Stack Engineer with 4+ years building AI-integrated SaaS, geospatial, and fintech products, preceded by 8 years running an independent graphic design and branding business. That combined background — design ownership plus production engineering — shows up directly in the work: pixel-accurate Figma-to-code implementation, brand-conscious UI, and backend systems (Node.js, React Native, Grok AI) built to handle real transaction volume. Track record includes automating M-Pesa payment reconciliation to 99.9% accuracy and building intent-based search for a live hospitality platform.

TECHNICAL ARSENAL

- Frontend & Mobile: React.js, Next.js, React Native, Tailwind CSS, Redux, Figma-to-Code
- Backend & Cloud: Node.js, Express, Firebase (Firestore, Functions, Auth), Render, PostgreSQL, MySQL
- AI & Logic: Grok AI (xAI) integration, Geospatial mapping (Maps API), automated reconciliation algorithms
- Payments & Fintech: M-Pesa Daraja API, PesaPal API (double implementation), transactional security, webhooks & IPN management
- Tools: Cloudinary, RESTful APIs, Git/GitHub

KEY PROJECTS

Reserve Me — AI-Powered Hospitality Engine | *Lead Full-Stack Developer*

reserveme.ke *Category: Hospitality*

Built for: Own startup — serving 10+ restaurant clients, including Lagos Suya Spot

- Architected a cross-platform mobile app with an intent-based search engine powered by Grok AI
- Implemented geospatial logic (Maps API) for real-time restaurant discovery and a secure Node.js backend on Render handling high-concurrency reservation data

VumaFlix — Creator-Rewards Streaming Platform | *Co-Founder & Full-Stack Developer*

vumaflix.com *Category: Film & Media / Startup*

Built for: Own startup (co-founded) — serving independent filmmakers and viewers

- Co-founded and built a streaming platform where independent filmmakers earn directly from movie sales
- Designed a referral-reward system turning viewers into promoters who earn when their shares convert to purchases
- Built with Vite, Firebase, Bunny.net, and Tailwind CSS, deployed on Netlify, with M-Pesa payment integration

DukaRecon — Automated Financial Reconciliation | *Full-Stack Developer*

Category: Fintech SaaS

Built for: SaaS product — clients include Modern Graphics Tech

- Engineered a matching algorithm to automate reconciliation of M-Pesa transactions against internal business records
- Reduced manual audit time by 80% and held 99.9% data accuracy across a unified web dashboard and mobile app

MTTA Awards — High-Traffic Live Voting Platform | *Full-Stack Developer*

Category: Civic Tech / Public Sector

Built for: Taita Taveta County — still in active use

- Built a public voting platform used by Taita Taveta County to award talented youth and businesses
- Scaled Firebase infrastructure to handle thousands of concurrent transactions and real-time tallying with zero downtime

Art Community Platform — Creative UGC Ecosystem | *Full-Stack Developer*

Category: Creative Community / Startup

Built for: Own startup — used by independent artists, including Gups Arts

- Architected a social platform for artists to showcase, sell, and communicate with fellow artists, using Sanity.io as a headless CMS
- Built user profiles, engagement metrics, and optimized image-heavy feeds for a creative community

Lagos Suya Spot — Transactional Ordering & Menu System | *Full-Stack Developer*

Category: Food & Beverage / E-commerce

Built for: Lagos Suya Spot restaurant — in active use

- Engineered an e-commerce platform for a top-tier Nairobi restaurant with PesaPal-integrated card/mobile money payments
- Built a custom cart and real-time order tracking system processing thousands of transactions monthly with 0% data loss at peak

PROFESSIONAL EXPERIENCE

IT Consultant | *Inicus Innovations Limited* **2024 – Present**

- Architecting digital transformation strategies for SMEs, focused on scalable web architecture and cloud integration
- Leading UI/UX implementation from Figma to production-ready React components

Frontend Software Developer | *Skill Consultants* **2023**

- Developed responsive frontend architectures for international clients in the Canadian market
- Optimized web performance and ensured cross-browser compatibility for high-traffic platforms

Frontend Software Developer | *INNOVATE (UK-based remote team)* **2022**

- Built modular, maintainable React components in a distributed team
- Integrated RESTful APIs and ensured seamless data flow between frontend and backend

Founder & Creative Director | *Unicus Printers and Advertisers* **2014 – 2022**

- Founded and ran an independent graphic design and branding studio, managing the full client lifecycle from pitch to delivery
- Delivered branding, print, and advertising design for local business clients, developing the visual and UX judgment now applied to product interfaces
- Directly informs current strength in Figma-to-code translation and brand-conscious UI implementation

Technical Mentor (Volunteer) | *Microverse* **2022**

- Conducted 100+ code reviews for junior developers against global best practices
- Provided technical guidance on data structures, algorithms, and full-stack development

EDUCATION

Full Stack Web Development Program | *Microverse* **2022**

- 1,300+ hours of full-stack development using Ruby on Rails, JavaScript, and React; daily remote pair-programming with an international cohort

Degree/Certificate | *Jomo Kenyatta University of Agriculture and Technology (JKUAT)* **2010 – 2014**

PROFESSIONAL REFEREES

- Steve Parkinson — Chairman, Phoenix Aviation — +254 728 523 098
- Jauhari Alafi — Xelion LTD, Netherlands — +31 6 40021212
- Dennis Kibani — Virtuosotech LTD, Nairobi — +254 721 765 740
